

Cyber Threat Lens

Powered by **Cyble**

AI-Powered Malware Sandbox

Every day, advanced cyberattacks seek to breach and compromise your digital environment. Networks and systems continually face threats from malwares. Cyble's Threat Lens can provide you with comprehensive analysis and keep your environment safe.

Ensure your infrastructures remains unaffected with **The AI-Powered Malware Sandbox**

Enhanced Live Monitoring

Quickly upload a file to the sandbox and watch its behavior unfold live. Monitor real-time activities such as process changes, registry modifications, and network interactions as they occur.

Advanced Threat Detection

Effortlessly detonate malware directly from our Indicators of Compromise (IoC) library. Examine file hashes to monitor real-time behavior and precisely identify potential threats.

Detailed Timeline Insights

Obtain a comprehensive view of malware activities, including interactions with system components and external networks. This feature provides valuable insights into the malware's development and behavior over time.

Behavior Analysis & Research

Analyze malware in a sandbox to uncover its methods, propagation techniques, and impact, ensuring proactive threat management. Cross-reference its capabilities with a TTP library to identify and map Threat Actors, enhancing anticipation and counteraction of threats.

STRENGTHEN YOUR CYBERSECURITY APPROACH!

Ensure that no malware impacts your network or system.

Cyble Threat Lens can provide comprehensive sandbox analysis and keep your environment safe.

Explore our platforms today and fortify your defenses!
